## L B WANNAMAKER SEED CLOSURES OUT 86-YEAR HISTORY

BY CADE MCCONNELL

Luther B. Wannamaker Jr. once worked as an ad and speech writer for an insurance company. Now, he's known as a seed man. For the past 57 years, Luther has sold a variety of seeds through the L B Wannamaker Seed Co. After a long career marked by three evolutions, Luther Wannamaker recently decided to retire.

In 1966, Luther moved back home to St. Matthews, SC to work for the family company. Without a background in the seed industry, he learned how to breed soybeans, planting thousands of rows by hand. Using the knowledge gained from his attempts at soybean breeding, Luther was able to evaluate and sell new varieties from other South Carolina breeders in southern Alabama.

In the 1970s, economic hardship hit many small seed companies including Wannamaker. Seeking a new revenue stream, Luther journeyed to Japan where he learned to grow black soybeans and Nattō soybeans, both of which are edible varieties. Wannamaker Seed grew and sold these varieties to Japan for nearly 20 years until eventually the Japanese buyers found other less expensive producers and the L B Wannamaker seed company had to reinvent itself once again.

Luther became interested in a variety of grain called naked oats after noticing their relatively high protein content. Howard Harrison of Coker Pedigreed Seed Co. had brought naked oats from Germany and adapted them to the southern climate but needed help to market them. Luther jumped at the opportunity. Around the same time, he met Bobby McDonald, the son of a horse jockey. They decided that they would market naked oats as the feed of choice for thoroughbred horses.

In the early 2000s, after discovering that deer and wild turkeys would eat naked oats, Wannamaker began selling them as wildlife feed. Luther then realized that the Nattō soybeans he grew for years also made for good deer food. He mixed the

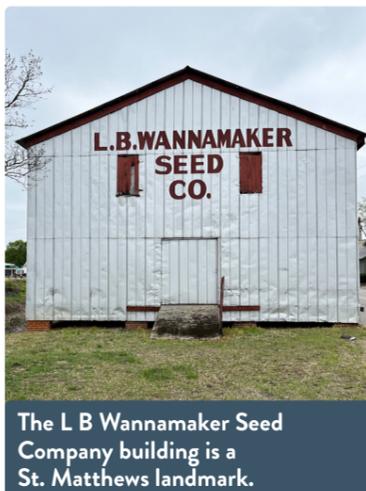

Claudia Paulling (left) with Luther and Doraine Wannamaker.

soybeans with cowpeas and has sold the wildlife seed through Wannamaker Wildlife for the past 20 years.

Even at 93, Luther remains busy. In retirement, Luther is pursuing his interest in the American Revolution. He has recently dedicated his time to the stewardship of a piece of land purchased by his grandfather on the Fort Motte Battle Site and has commissioned a biography of Rebecca Brewton Motte.

In February, Luther and his wife Doraine held a farewell luncheon for friends, family, and customers of the Wannamaker Seed Company. They brought people from throughout the seed company's history to personally thank them and bid farewell. While Luther will no longer offer seed, he remains available for consultation regarding seed sourcing and wildlife planting.

The Wannamaker Seed Company has sold every remaining bag of seed as well as most of its equipment and machinery. The iconic L B Wannamaker Seed Co building still stands on F R Huff drive in St. Matthews. While there is no planned successor to the seed company, Luther leaves behind a legacy of adaptability and agribusiness acumen.

The L B Wannamaker Seed Company building is a St. Matthews landmark.

## COMMISSIONER'S CORNER

HUGH E. WEATHERS

SOUTH CAROLINA COMMISSIONER OF AGRICULTURE

## AN EMERGING MARKET

In March, I had the opportunity to lead a trade delegation to Thailand on behalf of the National Association of State Departments of Agriculture (NASDA).

As part of the Emerging Markets Program, four of us agriculture leaders from around the country, along with NASDA staff, traveled to Thailand to meet with government officials and business leaders. The focus of the trip was how we can increase trade between our two countries – and my focus, as ever, was how to create more opportunities for South Carolina farmers.

Thailand is a country of more than 71 million people. The biggest opportunity I saw for American farmers is Thailand's need for animal feed. They raise and process a lot of pork, poultry, and seafood, and they don't have sufficient domestic sources of feed ingredients. Of course, there are lots of other countries competing to sell feed to countries like Thailand.

We do not have a free trade agreement with Thailand. When the United States pulled out of the Trans Pacific Partnership, our trade relationship with Thailand was affected, and there's some work to be done – discussing existing

tariffs, speaking to political leaders, removing barriers – to improve opportunities for trade.

One of our goals was to help Thai ag leaders understand that the US is not a monolith. A state like North Dakota is very different from South Carolina in terms of port access, seasons, and what it grows.

We also discussed topics like sustainability, food safety, and ingredient quality.

I also got the opportunity to see a little of the country. We took a river cruise near Bangkok and saw some temples.

It was quite a month for international relations, as once I got back to South Carolina, I hosted some visitors from Vietnam. We took Ambassador Nguyen Quoc Dzung and members of the Vietnam Embassy to Coosaw Farms and Sharp & Sharp Certified Seed, where they took tours and discussed sustainable agriculture. Vietnam is another emerging market and important trade opportunity for South Carolina farmers.

Most recently, I was in Washington DC to speak to our South Carolina delegation about the Farm Bill. Progress is being made. And now, I'm happy to be back in my home state once again.

*Hugh E. Weathers*

It's Strawberry Season!

## The South Carolina Market Bulletin (ISSN 0744-3986)

The *Market Bulletin* is published on the first and third Thursday of each month by the SC Department of Agriculture, Wade Hampton Building, Columbia, SC 29201. Periodicals postage paid at Columbia, SC 29201.

Postmaster, send address changes to:  
 SC Market Bulletin, PO Box 11280, Columbia, SC 29211

### POLICIES FOR ADVERTISING

For our full policies, please visit:  
[agriculture.sc.gov/market-bulletin-policies](http://agriculture.sc.gov/market-bulletin-policies)  
 Only ads pertaining to the production of agricultural products and related items are published. Ads are accepted for South Carolina items, even if the seller lives out of state, provided the item is in state at the time the ad is published and at the time of sale.  
 Ads are published free of charge and in good faith. The *Market Bulletin* reserves the right to edit and verify ads but assumes no responsibility for their content.  
 Ads cannot be accepted from agents, dealers, or commercial businesses, including real estate. Sealed bids, legal notices, or consignment sales are not accepted.

### SUBMITTING ADS

No matter the submission method, submissions must include the advertiser's name, complete address with zip code and county, and phone number with area code. While we don't publish the address, we need this information for our records. Do not use all capital letters.

- **Online:** Go to [agriculture.sc.gov/market-bulletin](http://agriculture.sc.gov/market-bulletin). Select "Submit Market Bulletin Ad" and complete the form. If you include your email address, you will receive an automated reminder for a renewal.
- **Mail:** SC Market Bulletin, PO Box 11280, Columbia, SC 29211. You must use 8.5 x 11 inch paper.
- **Email:** Send ads to [marketbulletin@scda.sc.gov](mailto:marketbulletin@scda.sc.gov). Put the words "Market Bulletin ad" in the subject line.
- **Fax:** 803-734-0659

The deadline for submitting ads and notices is noon on Tuesday of the week **before** the publication date.

### Composting Class & Companion Planting Class

April 15

10 – 11:30 am | Composting Class

1 – 2:30 pm | Companion Planting Class

The composting workshop offers a demonstration on how composting lowers your carbon footprint while nourishing your soil. Attendees will learn how to layer brown and green matter collected from their kitchen, coffee, landscaping, and even packing supplies as well as the importance of amending your soil with nutrient dense organic matter to strengthen florals, shrubbery, and edible plants. Tickets are \$15 per person.

Companion planting practices combining species in close proximity for pest control, pollination, creating habitat for beneficial insects, maximizing space, and increasing crop productivity. By choosing native species of fruiting and flowering shrubs, herbs, grasses, bulbs, and trees, you can maximize annual blooms and sink carbon to filter the air, soil, and water. This tutorial will match florals, herbs, and leafy greens in a planter which attendees can take home. Tickets are \$30 per person.

#### The Farm at Senate's End

302 Senate Street, Columbia

Tickets: [bit.ly/40lhLwP](https://bit.ly/40lhLwP)

### Veteran Memorial Food Forest

April 22 • 9 am – 3 pm

Project Victory Gardens is a veteran-focused non-profit organization. We want to ensure that as we go about our daily activities, we remember those who stood alongside of us. Please join us as we prepare and plant a memorial food forest here on the property. Food forests and other permaculture techniques mimic nature and can provide a wealth of sustainable food in a small footprint. Join us as we convert a traditional forest into a thriving food forest. We will cover hugelkultur beds, food forest design and layering, and food guilds. Take a tour of the farm and enjoy a free farm fresh lunch!

#### Project Victory Gardens

140 Harbor Lane, Townville

[projectvictorygardens@gmail.com](mailto:projectvictorygardens@gmail.com) • 803-522-4703

[facebook.com/projectvictorygardens](https://facebook.com/projectvictorygardens)

### Ole Patchwork Spring Gathering

April 22 • 10 am – 3 pm

A fun family farm event with local artisans, crafts, and items made from scratch. Bring your cooler to take home fresh produce, meats, eggs, cheese, and milk. Get a head start on your spring planting with herbs, flowers, and vegetable plants. Enjoy lunch at the farm, music on the grounds and demonstrations. Visit the barnyard animals. Please, no pets allowed. This is an outside event. Parking is \$5.

#### 110 Dairy Lane, Saluda

# CERTIFIED SOUTH CAROLINA STRAWBERRY FARMS

There are few farm pleasures sweeter than a strawberry. Their flavor is simple; their season short; and here in steamy South Carolina they ripen early, making them one of the first signs of spring produce. Some farms are U-pick, while others sell their berries at roadside stands and local markets. Some farms may shift business models mid-season, inviting guests on the farm for U-pick only during the busiest times. Sometimes they even run out! It's best to track the farms on Facebook or Instagram and/or contact them before you visit.

# IT'S *Strawberry* SEASON

## Strawberry Mini Muffins

Recipe used with permission of Cayce-based food writer April Blake. For more of April's recipes, visit [theaprilblake.com](http://theaprilblake.com).

- 2 cups fresh strawberries, sliced or diced
- 3 cups all purpose flour
- 1 ½ cups white sugar
- 1 Tbsp ground cinnamon
- 1 tsp salt
- 1 tsp baking soda
- 1 cup vegetable oil
- 4 eggs, lightly beaten

Preheat oven to 400 degrees F. Butter and flour the mini-muffin tins (four or five tins for 48 muffins). Slice strawberries, and place in a large bowl. Sprinkle lightly with some of the pre-measured sugar and set aside. Combine flour, sugar, cinnamon, salt, and baking soda in a large bowl. Pour the oil and eggs into the strawberries and stir to coat. Add the strawberry mixture to the dry ingredients and blend until dry ingredients are just moistened. Divide batter into pans, using a small spoon. Fill each indentation in the muffin tins ¾ of the way full. Bake for 15–20 minutes or until an inserted knife comes out clean. Let cool in pans on a wire rack for 10 minutes. Turn the muffins out and eat warm or leave to cool.

## Strawberry Lemon Blondies

Recipe used with permission of McLeod Farms. For more McLeod recipes (strawberry, peach, pumpkin and more!), visit [macspride.com/recipes](http://macspride.com/recipes).

A bright-flavored twist on classic blondies, this dessert has a shortbread-like texture and lots of fresh South Carolina strawberries.

### BLONDIES:

- 1 cup unsalted butter, room temperature
- ¾ cup sugar
- 1 egg
- ¼ cup lemon juice
- 2 ¼ cups all purpose flour
- ½ tsp baking powder
- ½ tsp salt
- 1 cup Mac's Pride Strawberries, diced

### GLAZE:

- 1 cup powdered sugar
- 2 large Mac's Pride Strawberries
- lemon juice

Preheat oven to 350 degrees. Line a 9-inch square baking pan with parchment paper with long edges. This will help you lift out the blondies for easy glazing and icing. Cream together butter and sugar until fluffy. Beat in the egg until fully incorporated. Add lemon juice. Whisk together the flour, baking powder and salt. Add to wet ingredients mixing until no more dry flour is present. Gently fold in strawberries. Spread the mixture into your pan as evenly as possible. The dough will be thick. Bake for 30-35 minutes, just until starting to turn golden around the edges and the center is set. A toothpick inserted in the center will be moist but not wet. Let cool on rack. Trim the 2 strawberries for glaze and puree in small food processor or mash through a strainer to get about 1 Tbsp of puree. Whisk together the sugar, Tbsp of strawberry puree, and lemon juice until no lumps remain. If your glaze is too thick, add more sugar. If it's too thick add more lemon juice. Spread the glaze over the cooled blondies. Let the glaze set before slicing.

## Strawberry Ice Cream

- 2 cups heavy whipping cream
- 1 (14 oz) can sweetened condensed milk
- 1 pound of Certified SC Grown strawberries, mashed
- Red food coloring to achieve a brighter pink color and few slices of strawberry for garnish (optional)

Mash strawberries in a bowl and set aside. In large mixing bowl of stand-mixer or in a large bowl and using an electric hand mixer, add all the ingredients: heavy whipping cream, sweetened condensed milk. Whip the heavy cream mixture on high speed until stiff peaks form (to prevent massive splattering, start out at a slower speed and as the cream thickens, increase the speed). Be careful not to over mix or “break” the whip cream mixture. Pour the mashed strawberries into the mixture and gently fold in until combined. (Optional) for a brighter pink color, add a few drops of red food coloring into the mixture and gently stir. Pour the whipped mixture into a freezer safe container. Top with a few slices of strawberries for garnish (optional). Cover and freeze for about 4–5 hours. In about 3–4 hours you can have a “soft serve” type ice cream. If you prefer a more firm texture, freeze for at least 5–6 hours or overnight.

## Strawberry Kale Salad

Find more recipes at [freshonthemenu.com/recipes](http://freshonthemenu.com/recipes).

- ½–½ bunch of Certified SC Grown kale [2–4 cups chopped]
- 2 Tbsp extra virgin olive oil
- Pinch of salt
- 1 cup Certified SC Grown strawberries, chopped
- ¼ cup crumbled feta
- 1 cup Certified SC pecans
- Balsamic vinegar and olive oil, to taste
- 10 Certified SC Grown asparagus spears, blanched+ chopped

After washing and drying your kale, remove the ribs/stem from each kale leaf. Tear or chop the kale into bite-sized pieces. Pour a little olive oil in your hands and work your way through the kale, massaging the leaves until they darken in color and tenderize. Finish it off with a pinch of salt and combine with strawberries, pecans, and asparagus. Drizzle with balsamic vinegar and olive oil. Top with feta and dig in!

## Strawberry Salsa

- 1 pint Certified SC Grown strawberries, hulled and finely diced
- 1 jalapeño, stem and seeds removed, finely diced
- Half of a small red onion, peeled and finely diced (about ½ cup)
- ⅓ c. finely-chopped fresh cilantro, loosely packed
- 1 lime, about 2 Tbsp of juice
- Pinch of salt and black pepper

Toss all ingredients together until combined. Season with extra salt and pepper, if needed. Serve with tortilla chips.

## Fresh Strawberry Syrup

Recipe by Will Green.

Capture the essence of fresh strawberry flavor. Excellent on pancakes, French toast, or ice cream; and a spoonful or two mixed into cold sparkling water will produce a lovely strawberry soda. An immersion blender will make this task easier, but a jar blender will work fine.

- 1 ¼ lb ripe South Carolina strawberries, hulled and sliced thin
- 4 cups water
- 1 ½ cups white sugar
- Juice of one lemon
- Pinch of salt

Combine the water, salt, and sugar in a medium saucepan. Bring to a boil, then back down to a bare simmer. Stir to dissolve sugar and salt. Add 1 lb of strawberries (reserve ¼ lb of the very ripest berries) and simmer gently for 10 minutes. Remove from heat, add lemon juice and reserved berries. Blend for 1 minute. Pour resulting liquid through your finest sieve and into a large bowl. You will need to stir and press the liquid through the sieve to extract maximum flavor and yield. You may need to work in 2–3 batches, emptying the sieve each time. Jar the syrup. Will keep in fridge for a week.

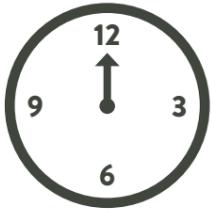

## How to Keep Strawberries

### IN THE REFRIGERATOR

Cooking website The Kitchn tested a variety of ways to keep strawberries fresh, finding most success with dunking the berries in a water bath made with 1 part white vinegar and 3 parts water, then draining them and drying them as thoroughly as possible using a salad spinner. If that sounds too involved, simply rinsing the berries and then thoroughly drying them in a salad spinner before putting them in the refrigerator also got decent results. The next best method was simply storing the berries, unwashed, in a clamshell or other container with air circulation. The best method, of course, is to try to use them as quickly as you can.

### IN THE FREEZER

Strawberries freeze well. Wash and hull them, then spread on a cookie sheet to freeze. Store in plastic freezer bags. Those of us with fridges too narrow for a cookie sheet can find decent results with just rinsing, hulling, and drying the berries off as much as possible before tossing them in a plastic freezer bag.

## DISPOSE OF WASTE PESTICIDES AT EVENTS THROUGHOUT SOUTH CAROLINA

BY SCDA

COLUMBIA — The South Carolina Department of Agriculture (SCDA) is offering South Carolina residents the opportunity to safely dispose of outdated, unusable or unwanted pesticides.

The pesticide and chemical program is open to all private, commercial and non-commercial pesticide applicators in the state, as well as homeowners. SCDA staff will be on site to monitor pesticide collection and disposal, and will have final authority on acceptance of products.

Additional details include:

- Quantities will be limited to 2500 pounds of solid and 300 gallons of liquid at no charge.
- Acceptable products include herbicides, insecticides, nematicides, fungicides and similar products used in agriculture production or around the home.
- Prohibited items include empty pesticide containers, rinsate, infectious, biological or radioactive materials, explosives, appliances, paint and compressed gas cylinders (metal cylinder with a valve).
- A hazardous material company will be on site to properly dispose of the materials collected.
- Materials should be transported to the collection event in sturdy boxes with newspaper stuffed between the containers to prevent spills.
- Leave items in the original containers.
- Workers will be on hand to unload vehicles, and citizens will be asked to stay in the car.
- Collection events may be cancelled due to inclement weather. The cancellation will be posted on SCDA's website, [agriculture.sc.gov](http://agriculture.sc.gov). Possible makeup dates will be announced at a later date.

For additional information, contact SCDA's John Stokes at 803-737-9696 or [jstokes@scda.sc.gov](mailto:jstokes@scda.sc.gov).

## SCDA WINS NOTABLE STATE DOCUMENTS AWARD FOR AGRITOURISM 101 MANUAL

BY SCDA

The South Carolina Department of Agriculture has been honored by the South Carolina State Library for its 2022 work on a manual for agritourism farms.

Winners of the South Carolina Notable State Documents award are announced in honor of Freedom of Information Day, which occurs annually on March 16. These noteworthy publications call attention to the most informative documents released by state agencies in 2022.

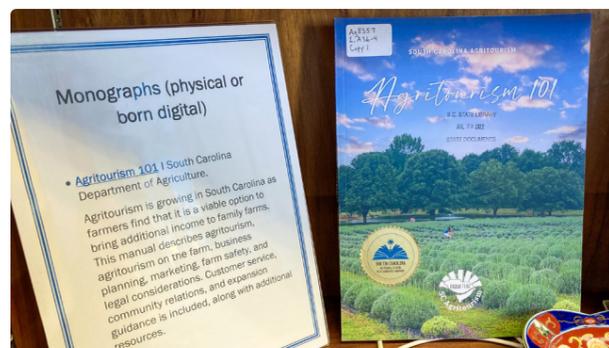

State documents come in a variety of formats and winning categories including state agency monographs, serials, and websites or apps. Nominations for the Notable Documents Awards were submitted throughout the year, with final candidates being judged by a panel of librarians and state employees. Candidates were judged based on their designs, writing styles, and breadth of information. The judges chose a unique group of 12 documents and websites for recognition, including a strategic plan for optimizing South Carolina's early childhood system, a student journal that showcases academic excellence, and a website developed by the state agency charged with ensuring the election process is fair, impartial, and easily accessible for everyone in our state.

SCDA won in the monograph category for *Agritourism 101*.

The judges wrote:

"Agritourism is growing in South Carolina as farmers find that it is a viable option to bring additional income to family farms. This manual describes agritourism, agritourism on the farm, business planning, marketing, farm safety, and legal considerations. Customer service, community relations, and expansion guidance is included, along with additional resources."

Leesa Aiken, South Carolina State Library director said, "South Carolina state documents provide a wealth of information, statistics, and share a broad range of knowledge about our state. I am pleased that we are able to publicly recognize these important publications and websites as notable documents and it is my hope that all South Carolina state agencies continue to produce high quality documents such as these."

# USDA ANNOUNCES \$29 MILLION TO INCREASE AMERICAN-MADE FERTILIZER PRODUCTION

FIRST ROUND OF AWARDS WILL SPUR COMPETITION AND GIVE U.S. FARMERS MORE CHOICES AND FAIRER PRICES

BY USDA

ORLANDO, Fla., March 10, 2023 – U.S. Department of Agriculture (USDA) Secretary Tom Vilsack today announced that the Department received \$3 billion in applications from more than 350 independent businesses from 47 states and 2 territories for the first two rounds of a new grant program to add innovative domestic fertilizer production capacity.

USDA also announced the first \$29 million in grant offers under the first round that focused on projects that can come online in the near term. The grants will help independent businesses increase production of American-made fertilizer, which will spur competition, give U.S. farmers more choices and fairer prices and reduce dependence on unreliable foreign sources like Russia and Belarus. Vilsack made the announcement at the 2023 Commodity Classic, the same event where he first unveiled the program a year earlier.

“I know that increased costs for fertilizer and other inputs have put a strain on farmers and cut into the bottom line. The Biden-Harris Administration and USDA understand the importance of taking on the root causes and need to invest in the agricultural supply chain here at home to create a resilient, secure and sustainable economy for the long haul,” Vilsack said. “By expanding the production of domestic fertilizer supplies, we can grow independent local businesses, bring production and jobs to rural communities and support fair prices for our farmers.”

The Biden-Harris Administration’s Fertilizer Production Expansion Program is part of a government-wide effort to promote competition in agricultural markets. The program supports fertilizer production that is independent, made-in-America, innovative, sustainable and farmer-focused.

## STRONG DEMAND

Vilsack made the initial announcement to dedicate \$250 million at the 2022 Commodity Classic, the same event where he is making the first awards a year later. From the start, it has been clear there is strong demand for the program and even before applications were being taken, President Biden directed USDA to increase the program to \$500 million at a farm visit in Illinois in May 2022. This fall, demand for the program was immediately evident by the sheer number, range and diversity of applications. More than 350 applications came in from applicants of every size and business model, including cooperatives, Tribal communities, female-owned companies and public bodies. These applicants requested between \$1 million and \$100

million for projects across 47 states, Puerto Rico and the Virgin Islands.

In all, \$3 billion in funding was requested for projects that could increase production immediately for Crop Years 2023 and 2024, as well as bolster long-term availability of U.S.-produced fertilizer. Projects were proposed for both fertilizers and nutrient alternatives, and represented different technologies, including composters, complex manufacturing, farm supply blenders and distributors.

In addition to increasing the supply of domestic fertilizer, the projects propose the creation or saving of hundreds of jobs, often in regions where they are most needed, including energy communities and those experiencing generational poverty. Additional details on the second round of applications will be released in the coming weeks as the reviews are completed.

## FIRST AWARD OFFERS

The first round of FPEP was focused on projects that could increase fertilizer capacity for the 2023 or the 2024 crop year, to prioritize projects with near-term impact. In January, a list of 21 potentially viable projects from the first round was released with a request for public comment. The \$29 million announced by Secretary Vilsack will be offered to eight independent businesses in Alabama, Colorado, Massachusetts, Missouri, Ohio and Washington. The grants will help businesses modernize equipment, advance climate-smart practices and build production plants, among other activities.

For example:

- In Sylacauga, Alabama, Pursell Agri-Tech LLC, a manufacturer of controlled-release fertilizer (CRF), is being offered \$4.9 million to assist with working capital that will increase its inventory by 40,000 tons per year. Each ton of CRF effectively doubles the nutrient benefit of a ton of fertilizer, making this 40,000 ton increase of CRF equivalent to 80,000 tons of uncoated fertilizer per year. These funds could be put to use beginning in spring 2023 with farmers realizing the benefit of increased fertilizer availability almost immediately.
- In Unionville, Missouri, Palindromes Inc. is being offered \$4.9 million to expand the use of anaerobic digestion and renewable energy to produce, process and sell climate-smart fertilizer and associated products. The project will convert animal manure, meat processing, and

food waste into dried organic fertilizers and soil amendments.

- In Othello, Washington, Perfect Blend LLC is being offered \$2.6 million to assist with expanding and increasing its ability to manufacture and process raw manure and fish waste into fertilizer by using its patented technology. This project will replace a stainless-steel dryer drum and construct a liquid fertilizer blending station and storage area on its facility.

A full list of offers announced today is available at [rd.usda.gov/media/file/download/usda-rd-nr-fpep-chart03092023.pdf](https://rd.usda.gov/media/file/download/usda-rd-nr-fpep-chart03092023.pdf)

## BACKGROUND

USDA began accepting applications for FPEP in September 2022. The Department initially announced plans to make \$250 million in grants available but quickly doubled the available funding to \$500 million to address rising costs and spur competition.

Fertilizer prices more than doubled between 2021 and 2022 due to many factors, including price hikes caused by the war in Ukraine, a limited supply of the relevant minerals, high energy costs, high global demand and agricultural commodity prices, reliance on imports, and a lack of competition in the fertilizer industry.

FPEP is part of a broader effort to help producers boost production and address global food insecurity. For more information, visit [rd.usda.gov/fpep](https://rd.usda.gov/fpep) or [farmers.gov/global-food-insecurity](https://farmers.gov/global-food-insecurity).

It is one of many ways the Biden-Harris Administration’s is promoting fair competition, innovation and resiliency across food and agriculture and combating the climate crisis by conserving and protecting our nation’s lands, biodiversity and natural resources, including our soil, air and water.

Under the Biden-Harris Administration, Rural Development provides loans and grants to help expand economic opportunities, create jobs and improve the quality of life for millions of Americans in rural areas. This assistance supports infrastructure improvements; business development; housing; community facilities such as schools, public safety and health care; and high-speed internet access in rural, tribal and high-poverty areas. For more information, visit [rd.usda.gov](https://rd.usda.gov). If you’d like to subscribe to USDA Rural Development updates, visit our GovDelivery subscriber page.

## REGISTRATION OPENS FOR GOVERNOR’S SCHOOL FOR AGRICULTURE 2023 SUMMER CAMPS

Registration has begun for the 2023 schedule of Summer Camps hosted by the South Carolina Governor's School for Agriculture at John de la Howe. This year's schedule begins on Monday, June 12 with our Environmental/Outdoor Recreation Camp and continues through July 20 with no fewer than seven camp opportunities for students ages 6 and up.

The summer camp schedule includes agricultural-focused camps exploring horticulture, equine skills, animal science, outdoor recreation, and environmental and natural resources. For more information, contact the Education Center at John de la Howe at (864) 391-0414 or email [kinsley.miller@delahowe.sc.gov](mailto:kinsley.miller@delahowe.sc.gov).

Here is the full schedule:

### JUNE

- June 12 | Environmental/Outdoor recreation camp (ages 6–10)
- June 13 | Equine Camp (ages 6–10)
- June 15–17 | Equine Camp (application required) (ages 14–17)
- June 22 | Animal Science/Horticulture Camp (ages 6–10)

### JULY

- July 13 | Environmental/outdoor recreation camp (ages 11–14)
- July 16–19 | Aggie Adventure Camp (application required) (rising 8<sup>th</sup> and 9<sup>th</sup> graders)
- July 20 | Animal Science/Horticulture Camp (ages 11–14)

# CLEMSON AWARDED USDA GRANT TO STUDY SALINE-WATER IRRIGATION TO GROW SALT-TOLERANT CROPS

BY DENISE ATTAWAY, CLEMSON UNIVERSITY

A limited amount of freshwater threatens agriculture production and food security, but researchers believe some crops can be grown sustainably in saline water if proper techniques are used.

with effective management of water, nutrients and fertilizers, as well as salinity, we believe we can grow salt-tolerant crops sustainably according to both economic and environmental metrics,”

The study will be conducted in vegetable growing areas of South Carolina and Florida and will be extended to Arizona. Objectives of the 5-year research, education and Extension project, which

The researchers are from Clemson University, the University of Florida and the United States Department of Agriculture’s Agricultural Research Service. Led by Clemson professor Raghupathy Karthikeyan, the research team has received a \$10 million grant from the United States Department of Agriculture National Institute of Food and Agriculture (USDA NIFA) to study development of a controlled environment agriculture (CEA) platform for growing salt-tolerant crops – mustard greens, cucumbers and tomatoes – using saline water for irrigation.

begins on April 1, include developing a hydroponic CEA platform, using saline waters for irrigation, managing salinity to better align with crop responses as the crops become acclimated to high salinity and selecting mustard greens, cucumber and tomato varieties for enhanced salt tolerance.

This grant is part of a \$70 million dollar investment from the USDA to establish robust, resilient, and climate-smart food and agricultural systems.

In addition to Karthikeyan and Amy, other Clemson

“In many freshwater-scarce regions, saline water sources such as brackish groundwater are available and can be used for irrigation,” said Karthikeyan, Newman Endowed Chair Professor of Natural Resources Engineering and project director. “However, increased soil and land salinization restricts use of these water sources in traditional open field cultivation, a problem that can be reduced by using hydroponic (soilless) cultivation in CEA. Several high-value food crops are salt sensitive but can be made more salt tolerant through breeding.”

CEA covers a variety of systems, including greenhouses and modular containers, that take a technology-based approach to farming. These systems are designed to provide optimal growing conditions for crops and prevent disease and pest damage. Hydroponic agriculture is using a water-based nutrient solution rather than soil to grow plants.

“By using desalination techniques that are appropriate to the agricultural sector coupled

said Gary Amy, dean distinguished professor in the Clemson Department of Environmental Engineering and Earth Sciences. “We are advocating partial desalination technologies to produce tailored-quality irrigation water to match the salt tolerance of a target crop.”

The overall goal is to develop a hydroponics CEA platform for cultivating salt-tolerant food crops using saline irrigation water while ensuring no environmental impacts associated with salinity are created.

“We will do this by enhancing crop salt tolerance through breeding, developing new concepts in agricultural desalting technologies and optimizing salinity management,” Karthikeyan said.

Knowledge gained from this study will help growers use marginal quality water for year-round production.

Controlled environment agriculture has a market value of more than \$70 billion. This amount is expected to increase as CEA use increases.

researchers include Jeff Adelberg, Sandra Branham, David Ladner and Michael Carbajales-Dale. These researchers provide expertise in horticulture, plant breeding, water science and technology, and life cycle assessment. Dale Layfield and Kenneth Robinson will lead education and Cooperative Extension Service activities.

Researchers from the University of Florida are Melanie Correll, Elias Bassil, Ray Huffaker and Haimanote Bayabil. Rama Radhakrishna is a researcher from Purdue University. C.S. Kousik, Kai-Shu Ling, and Clinton Williams from the United States Department of Agriculture Agricultural Research Service also are involved.

Information from the United States Department of Agriculture Economic Research Service shows agriculture accounts for much of the total freshwater consumption in the United States. Irrigated crop production helps support local rural economies and contributes to the nation’s livestock, food processing, transportation and energy sectors.

## SOUTH CAROLINA COMMISSIONER’S SCHOOL FOR AGRICULTURE NOW ACCEPTING APPLICATIONS FOR SUMMER 2023

DEADLINE IS APRIL 12

BY SCDA

The 2023 South Carolina Commissioner's School for Agriculture is set for July 22–28 at the Clemson University campus.

A partnership between Clemson University and the South Carolina Department of Agriculture, this summer program strives to provide challenging and enriching college-based experiences for a limited number of rising 11<sup>th</sup> and 12<sup>th</sup> grade students interested in agriculture and natural resources.

The program provides an academically focused curriculum that integrates subject matter from a

variety of related disciplines, and includes farm visits, leadership activities and more.

The South Carolina Commissioner’s School for Agriculture application is live now. Applications are due by April 12, 2023.

Students will choose among several emphasis areas: Livestock Production, Forestry and Natural Resources, and Plant Science.

To find out more about the program and to apply, visit [clemson.edu/cafls/sccsa](http://clemson.edu/cafls/sccsa).

# NEW REPORT REVEALS GROWING FOOTPRINT, INFLUENCE OF FOOD & AG SECTOR IN U.S. ECONOMY, BEATING PRE-PANDEMIC LEVELS

FEEDING THE ECONOMY REVEALS NEW DATA ON JOBS, WAGES, AND ECONOMIC OUTPUT AT DISTRICT, STATE, AND NATIONWIDE LEVELS

On March 21, 25 food and agriculture groups released the seventh annual Feeding the Economy report, revealing food and agriculture industries and their suppliers contribute over \$8.6 trillion to the U.S. economy, nearly one-fifth of total national output and a 22% increase since the 2019 report. Providing data on jobs, wages, and economic output, this farm-to-fork analysis illustrates the food and agriculture sector's impact on local and nationwide economic activity. The data also underscores this sector's resilience and reliability amid unprecedented global and domestic crises, including the commodity shock following the war in Ukraine and continued supply chain disruptions.

This year's report shows the U.S. food and agriculture sector directly supports nearly 23 million jobs, provides \$927 billion in wages, and is particularly vital to rural communities across America. Notably, the 2023 report reveals that the manufacturing of agricultural products accounts for nearly one-fifth of total manufacturing jobs in the U.S. Overall, more than 46 million jobs are supported across the food and agriculture supply chain, increasing nearly 2% since the 2019 report despite the economic challenges and disruptions associated with the global pandemic.

All 50 states displayed increased economic output in the 2023 report compared to the 2022 report, largely reflecting a rebound in national economic activity. The largest gains in total output were from Hawaii (31%), North Dakota (26%), New York (23%), Nevada (22%), and Florida (21%).

Key findings from national data include:

- **Total Jobs:** 46,283,917 (up 1.5% since the 2019 report)

- **Total Wages:** \$2.61 trillion (up 26.2% since the 2019 report)
- **Total Taxes:** \$947.93 billion (up 3.8% since the 2019 report)
- **Exports:** \$202.2 billion (up 24.4% since the 2019 report)
- **Total Food and Ag Industry Economic Impact:** \$8.6 trillion (up 21.8% since the 2019 report)

Some highlights from South Carolina are:

- **Job:** 655,728
- **Wages:** \$28.9 billion
- **Taxes:** \$10.5 billion
- **Exports:** \$1.1 billion

The strength and growth highlighted in this year's report reinforce that agriculture is evolving and innovating to meet the demands of the 21st century. According to the U.S. Department of Agriculture, between 1948 and 2019, land use for agriculture decreased by 28% while land productivity grew nearly four times and labor productivity grew more than 10 times. In fact, agriculture's total factor productivity growth rate is among the highest of U.S. sectors.

"Agriculture is foundational to the U.S. economy, reaching far beyond the farm gate, supporting over 46 million jobs. In manufacturing, more than twice as many Americans are manufacturing agricultural products as cars and trucks," said Corn Refiners Association President and CEO John Bode. "The resilience of the food and agriculture sector is clear – all 50 states increased economic output in the 2023 report."

"This study highlights the impact the greater food and ag sector industries have on the American economy and the sector's critical role in providing

economic opportunity, nutritional value, and safe food for all Americans," said American Bakers Association President and CEO Eric Dell.

"The Feeding the Economy report has focused on the jobs and economic activity created across the food value chain – from crop inputs to the services that it takes to put food on the table. Today, in the face of supply chain disruptions and the Ukraine Conflict, we truly need to think about the urgent need to feed people in addition to the important role that agriculture plays in our economy," added CropLife America President and CEO Chris Novak.

This latest report, along with additional quotes from sponsoring organizations, can be found at [FeedingTheEconomy.com](https://FeedingTheEconomy.com).

Sponsoring organizations include American Bakers Association, American Beverage Association, American Farm Bureau Federation, American Frozen Food Institute, American Soybean Association, Association of Equipment Manufacturers, Corn Refiners Association, CropLife America, The Fertilizer Institute, FMI – The Food Industry Association, Global Cold Chain Alliance, Institute of Shortening and Edible Oils, International Dairy Foods Association, National Association of State Departments of Agriculture, National Grain and Feed Association, National Grocers Association, National Milk Producers Federation, National Oilseed Processors Association, National Pork Producers Council, North American Meat Institute, Peanut and Tree Nut Processors Association, SNAC International, The Sugar Association, U.S. Dairy Export Council, and U.S. Grains Council.

## ACRE SEEKS PITCHES FOR ADVANCED ENTREPRENEURSHIP PROGRAM

BY EVA MOORE

The Agribusiness Center for Research and Entrepreneurship (ACRE) at the South Carolina Department of Agriculture is now accepting applications for its 2023 Advanced Entrepreneurship program.

The competitive program is for agribusiness entrepreneurs who would benefit from business mentoring, targeted funding, and access to grant consultants. Applicants selected will have the opportunity to pitch to a panel of judges, competing to be awarded up to \$25,000 for their company or product.

In its five years of existence, ACRE has awarded over \$888,500 to 81 agricultural entrepreneurs, funded 24 major, industry-driven research projects and provided intensive training to 106 businesses.

"ACRE's Advanced program has a great track record of helping entrepreneurs take the next step with their agribusiness," says Kyle Player, ACRE's executive director. "In addition to the grant funding we provide, we put them in a position to successfully apply for federal grants and other programs."

The Advanced Entrepreneurship application requires a business plan and an advanced prototype or sales history for the applicant's company or product. Businesses must be located in South Carolina. The application includes a detailed guide to what ACRE is looking for in a business plan. Applications are due by April 20, 2023.

ACRE has a separate Curriculum Program track each fall for beginning innovators who have an agribusiness idea but don't have experience in business.

For more information, visit [acre-sc.com](https://acre-sc.com) or contact Kyle Player at 803-734-2324 or [kplayer@scda.sc.gov](mailto:kplayer@scda.sc.gov).

## 2<sup>ND</sup> ANNUAL CERTIFIED SC SHOWCASE, COLUMBIA, SC
